Equity and Road User Charging in Fife

TTR has been commissioned by Fife Council to consider the implications for Fife of any road user charging scheme which might be introduced by the City of Edinburgh. The study will review previous road user charging modelling work undertaken on the scheme by the City of Edinburgh, assess the likely impact on Fife from either a single or a double cordon road charging scheme being introduced, and in particular the public transport investment package for Fife relative to the charging proposals. The study team will work very closely with Fife Council and are due to report in late September 2002.
