**Nottingham Schools Travel Plan Study**

TTR has been appointed to undertake a travel plan survey of all teachers and other school staff in Nottingham. The questionnaire, being sent to 4675 employees in approx 130 schools, asks staff about their travel patterns to and from their place of work. The results will help the project team assess the particular needs of this group over and above other City Council employees, and how the needs of staff within the group e.g. teaching staff and other workers such as midday supervisors and cleaners differ. The information will be used to guide the development of pilot projects offering school employees greater travel choice for their journey to work.

It is hoped that the outcomes of the project will help support recruitment and retention of school staff by the Education Department and may enable schools to make better use of their sites by reducing the demand for parking spaces.
